Measure. Control. Report. Save.

# Electrical Meter Recording System

## Lite Version

The ECO-METRX Lite version is a system that monitors a single circuit and is designed to be installed on a permanent or temporary basis. Data can be viewed live on the screen, stored with the SD card option or polled from an OPC Server.

# Electrical Meter Recording System

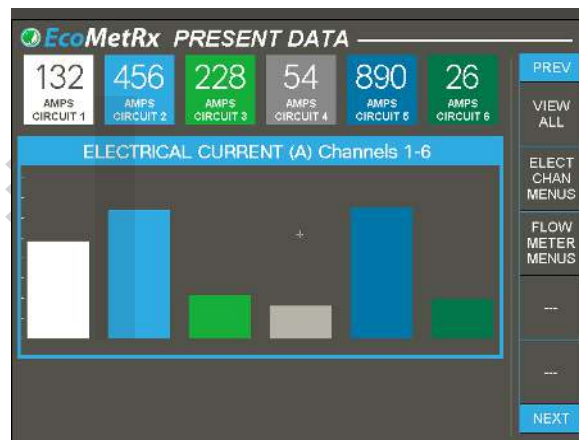

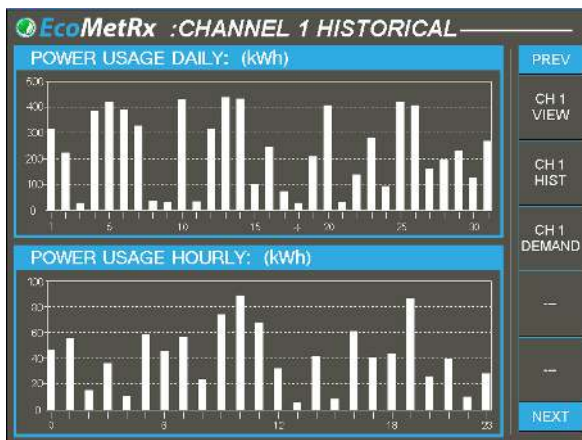

## Standard Version

The ECO-METRX standard version collects and stores electrical current, voltage, power, power factor and demand metrics so users can slice and dice the data to save on the plants energy bill. The system automatically logs to CSV files that in turn can be uploaded to a FTP server. With the MES option, data can be inserted directly into a database.
